PRODUCT AND DEVELOPMENT PARTNERSHIP

Clash Compass

A website and iOS companion for Clash of Clans.

Base layouts, army loadouts and village upgrade planning. Built and maintained by Ali.

clashcompass.com

Prepared for MOBA Network | 5 November 2026

What players are planning

Clash of Clans combines village progression with repeated multiplayer battles. Each decision affects what players can build, defend with and take into their next attack.

01

Develop a village

Buildings, heroes and research use time, resources and limited upgrade queues.

02

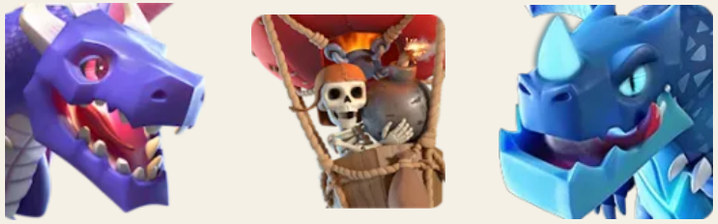

Defend a base

A layout arranges defenses. Players choose layouts for their Town Hall and battle type.

03

Prepare an attack

An army combines troops, spells, heroes, pets, equipment and Clan Castle support.

The product connects village progression, layout selection and battle preparation in an external companion workflow.

Planning around the next war

Competitive players need more than a list of popular armies. The chosen army must fit their village and be usable when league attacks begin.

01 **Army loadouts**

Inspect the complete army: troops, spells, siege, heroes, pets, equipment and main / Clan Castle allocation.

02 **Hero availability**

Plan hero upgrades around the chosen league window. Two builder queues can focus on heroes before the protected period.

03 **Upgrade dependencies**

Turn the army choice into priorities for the laboratory, camps, barracks and required buildings before the next Town Hall.

A connected workflow: choose an army, review the village, schedule the upgrades and preserve the planned attack window.

Esports layouts with HD previews

Inspect the full arrangement, then open the published layout link directly in Clash of Clans.

300

published esports layouts

TH18 collection, with an HD preview for every published esports layout.

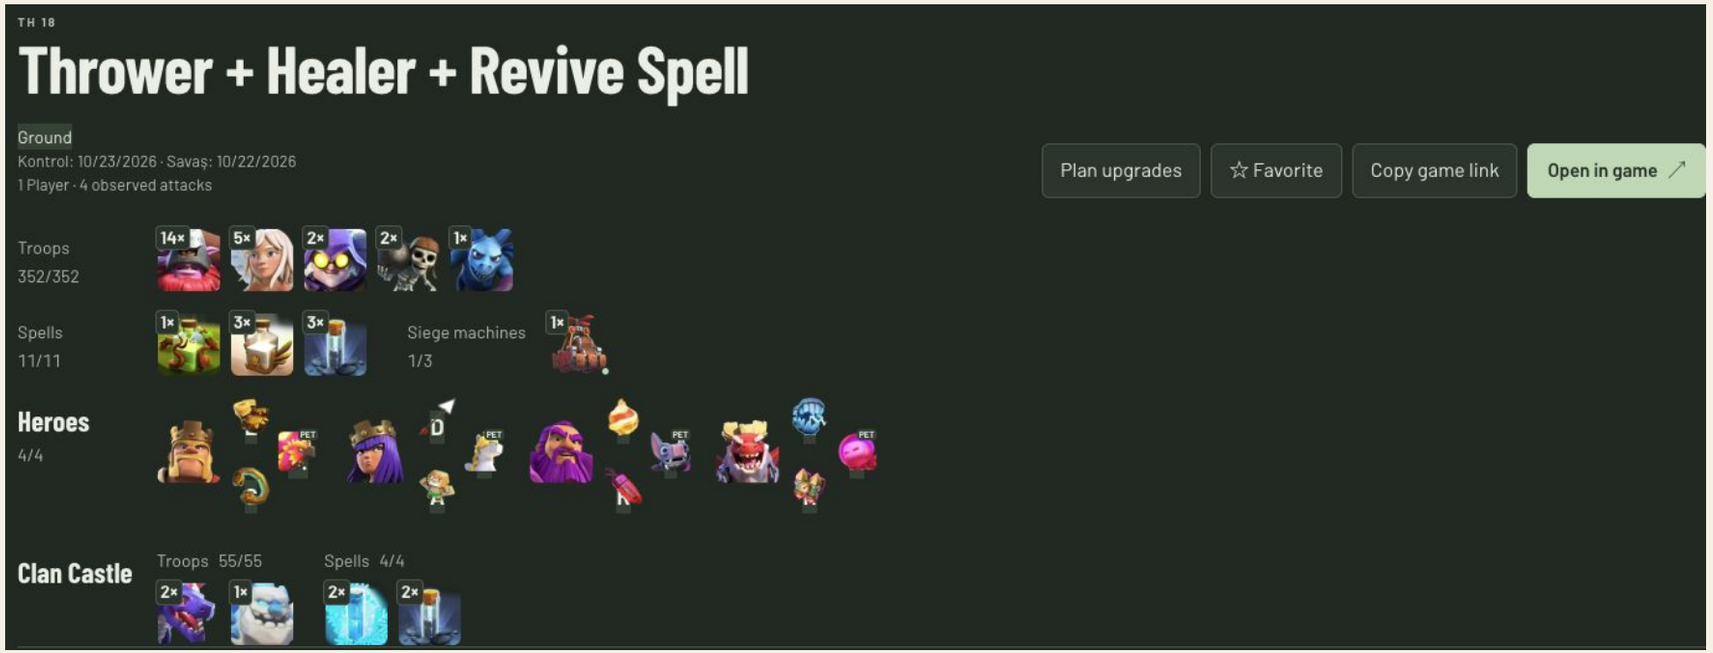

Automated source checks and in-game photo captures support image publication and source-version tracking.

Open the esports collection

Catalogue verified 5 November 2026. All 300 published esports previews are at least 1920 x 1080 pixels; source metadata version 18.202.

Army composition on the live website

Troops, spells, hero loadouts and Clan Castle contents in one view.

Open the army library

Actual Clash Compass website capture, 6 November 2026.

Complete loadout

Review pets and equipment with the selected heroes.

Player context

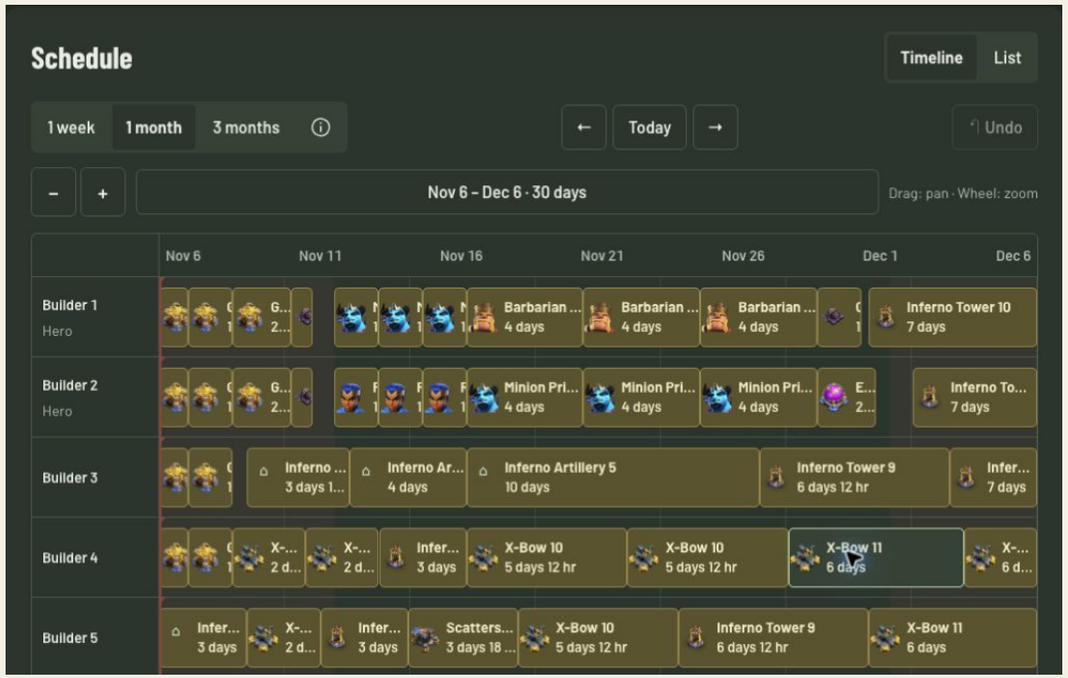

Use village levels to identify the relevant army upgrades.

Open in game

Use the original published CopyArmy link.

The actual builder timeline

A village-specific schedule for builders, heroes, laboratory and pets.

View website and interactive example

Actual Clash Compass planner capture, 6 November 2026. The web presentation also includes an illustrative interactive schedule.

Six builder queues

Follow upgrades as builders become available.

Hero availability

Plan hero work around the selected league window.

Army priorities

Prioritize the troops and buildings the chosen army needs.

One more upgrade running in parallel

The sixth builder adds a permanent construction slot in the Home Village. The tool brings the remaining B.O.B. requirements into one view.

5 to 6 builders

+20% SIMULTANEOUS BUILDER CAPACITY

Three gear-ups

Gear up the Home Village Cannon, Archer Tower and Mortar.

Troop level 18

Bring one Builder Base troop to level 18.

Defense level 9

Bring one Builder Base defense to level 9.

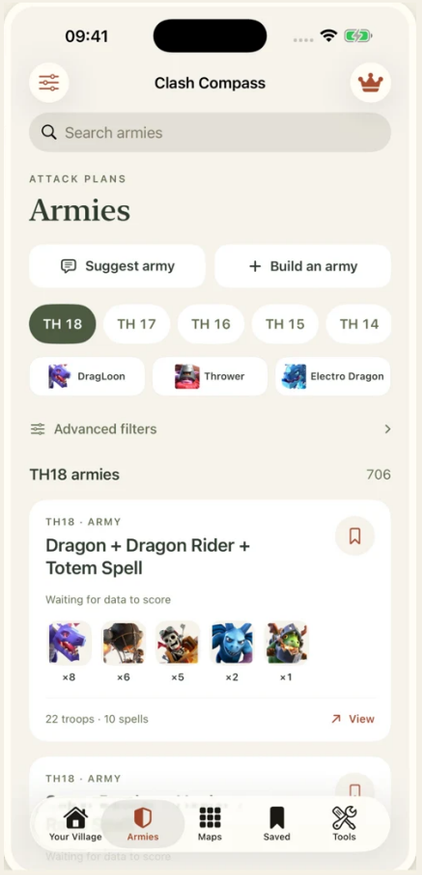

Hero levels 45

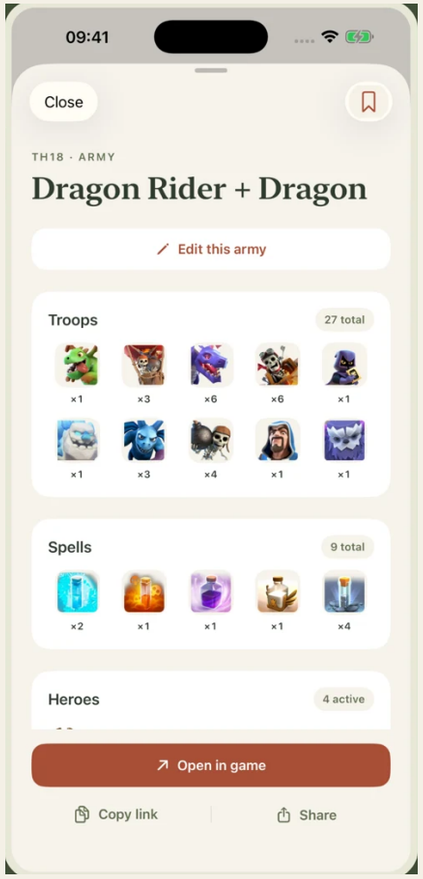

Reach 45 combined Battle Machine and Battle Copter levels.

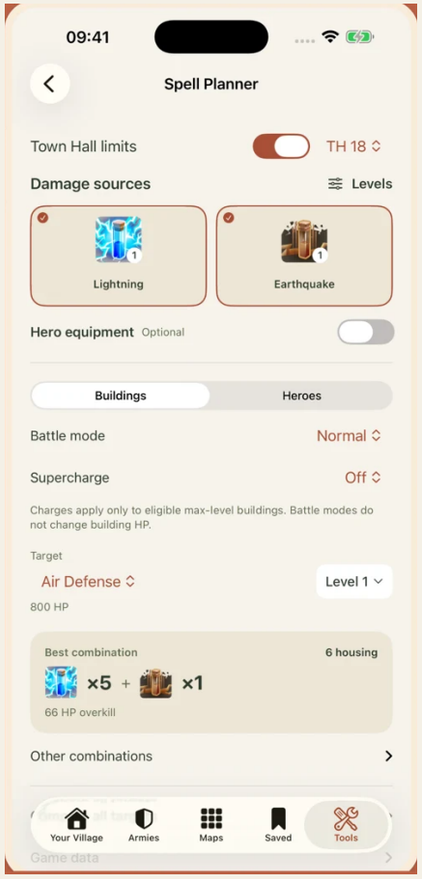

Unlock path: Builder Hall 9 > B.O.B. > an additional Home Village construction queue.
Open the sixth-builder tool

Requirements: Supercell Builder Base 2.0 announcement. The tool evaluates the imported village state and remaining upgrade paths.

Available on the App Store

3

paying subscribers

FIRST PAID ADOPTION

Regular layouts, army browsing and companion tools provide the free entry point. Esports layout access is the initial paid content route.

Audience data from Cloudflare

14 OCTOBER - 4 NOVEMBER 2026 | UTC

154,079

Cloudflare edge page views

29,888

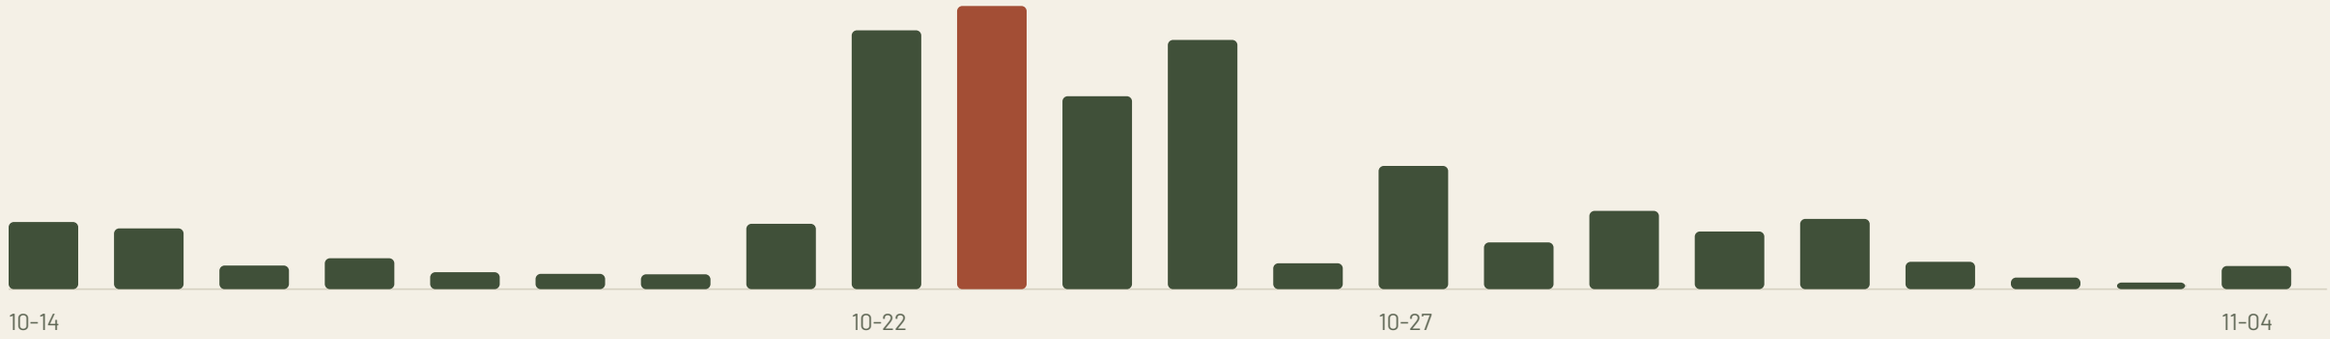

period unique IPs

258,601

edge HTTP requests

Daily edge requests

Peak: 41,848 requests on 23 October

United States: 180,758 requests (69.9% of the period total). **PostHog:** 230 recorded client page-view events, shown separately in the workbook.

Cloudflare GraphQL httpRequests1dGroups, retrieved 5 November 2026. Country request totals and metric definitions are included in the data pack.

Battle data and validation

1,165,019
raw battle records

37,373
stored player profiles

9,666
TH18 player profiles

The research database spans multiple Town Hall levels and battle modes. TH18 contributes 286,355 raw battle records across home-village, Ranked and Legend scopes.

Method

Compare with prior and regularized baselines using separate player, composition and future-time evaluations.

Structured collection

Attacker-to-opponent discovery expands a persistent network. Scope and composition checks prepare training data.

VALIDATION PIPELINE

Validation separates players, compositions and future-time data, then compares calibration, ranking and predictive error against prior and regularized baselines.

TH18 Ranked report: experimental | 23 October 2026

Research snapshot: 5 November 2026. Inspected TH18 Ranked fit: 3,200 eligible matches and 468 players. Definitions and report status: page 14.

Existing tools and Clash Compass

Product	Workflow	Result
Clash Ninja	Village import: track upgrades and schedule builders and laboratory.	Progress overview and upgrade timeline
ClashClock	Village and availability: plan upgrade queues and completion times.	Builder and laboratory schedules
Clashify	Village or battle tool: track village and equipment; calculate ZapQuake.	Progress tracking and battle calculations

CLASH COMPASS

Village levels, the chosen army and upgrade priorities in the same workflow.

Commercial development and partner fit

Existing route: esports layouts

Paid esports layout access provides the first commercial route in the iOS app.

Option to evaluate: advertising

A measured website advertising pilot can connect content demand with MOBA Network commercial and audience expertise.

Audience and content development

Improve discovery, expand the layout catalogue and connect the website to iOS. Measure repeat use and content engagement throughout.

WHY SPEAK WITH MOBA NETWORK

MOBA's May 2026 strategy describes in-game companion apps and selected web platforms, with advertising and subscription development.

The proposed partnership combines an existing Clash of Clans product and developer continuity with product, audience and commercial support.

Proposed focus: product delivery, audience development and a measured commercial pilot.

MOBA Network strategy source: company announcement, 21 May 2026 (Nasdaq). Fan-content policy reference: page 14.

A paid development partnership

I would like to continue building Clash Compass myself, with support that makes development and operation sustainable.

01

An initial project payment

Support the existing product, infrastructure and first agreed development phase.

02

Ongoing monthly compensation

A continuing paid role for product delivery, maintenance, game-data updates and agreed improvements.

03

Terms agreed together

Define scope, responsibilities, ownership and any revenue participation during negotiation.

FIRST 90 DAYS - PROPOSED SCOPE

Days 1-30: reconcile analytics and operating costs. **Days 31-60:** improve the highest-use player workflows. **Days 61-90:** review acquisition, repeat use and monetization tests.

Proposed structure: an upfront payment followed by a continuing paid development role, with terms agreed together.

Sources and metric definitions

Supporting sources and data definitions for the accompanying spreadsheet.

Cloudflare: delivery-layer page views, HTTP requests and period-deduplicated IPs. Includes automated and technical traffic. Country totals describe requests.

PostHog: 230 recorded client page-view events; days use the project timezone. Consent, blockers and instrumentation affect coverage.

Research: raw records span scopes and include rows excluded from training. The inspected TH18 Ranked report is experimental; its week begins 19 October.

Paid adoption: three subscribers is the founder conversation snapshot. iOS visuals: App Store artwork, 26 October.

Commercial policy: Supercell generally permits advertising, unconditional donations and coaching, including base layouts. Other paid functionality requires express approval.

Catalogue: 300 published TH18 esports layouts; 299 images at 1920 x 1080 and one at 2712 x 1220. Audit: 5 November 2026.
